Preventive and Restorative Dentistry

Consent for Halcion

Patient: _____ Date: _____

Weight: _____ Age: _____ Vitals: _____

Halcion is a benzodiazepine used to treat sleep disorders. You will feel relaxed and may fall asleep during or after your dental visit. Halcion will cause some degree of amnesia and its effects may last up to 6 hours.

You can NOT drive or drink alcohol for the remainder of the day. After the dental visit you are required to rest at home under observation by a friend or family member.
